I am making a career transition into UX design because I have always been passionate about the tech industry. After graduation I planned on pursuing social work but upon further research discovered that UX would allow me to help others by empathizing with the users in a perfect combination of my interests. I am eager to begin applying my problem-solving skills to a position in UX design to help others.

SKILLS

Figma, Sketch, InVision, Adobe Creative Suite, Zeplin, Principle, Webflow, Responsive Web Design, iOS/Android/Software Development, A/B Testing, Market Research, Qualitative & Quantitative Research, User Usability Testing/Research, Interaction Design Principles, Information Architecture, Wireframing, Prototyping, Presentation Skills, & Agile Learner.

PROJECTS

The PawPrints App | Product Designer

JAN 2021 – APRIL 2021, A CAPSTONE PROJECT

Designed with Figma, & InVision Studio to create a social media app for dog-owners that provides the user to match & find fun activities for their dog in the nearby area, as well as collaborate with other dog-owners to make it easier for dog's and owners to interact.

It's A Start | User Experience Designer

FEB 2021- FEB 2021, A 24-HR HACKATHON HOSTED BY GOOGLE

Collaborated with a team of 4 different disciplines to create a product to their challenge. The product the 9 of us created in less than 24-hrs provides the user access to live support groups that they can view from their iOS device or just listen in on the discussion on different healthcare topics. The user can join different communities or learn more about many different healthcare related topics.

EDUCATION

BrainStation | User Experience Design Diploma

JAN 2021 - APRIL 2021, ARVADA, CO

University of Colorado, Boulder | BA in Philosophy & Psychology

JAN 2011 – DEC 2018, BOULDER, CO

EXPERIENCE
